

THIS HOSE WAS THE LOWEST COST-PER-FOOT.

When hose integrity really matters, specify TITAN Factory Certified.

Some companies run the risk of leaks, cracks, delamination and worse, all to save a few cents a foot on a hose assembly.

Don't be one of them.

Low-cost hose causes high-ticket headaches.

Regardless of what you run through it, poor quality hose or couplings can be expensive — you could contaminate the product, ruin costly equipment, cause environmental damage or major production delays.

That's why you should specify Titan for all your hose applications — and Titan Factory Certified for those applications where one leaky hose could be one major headache.

The only seamless tube and one-piece cover.

Every hose Titan makes is built on a one-piece seamless tube, laid up with Titan's unique Araña — a machine designed to spiral high-strength yarn at precisely controlled angles in a single pass. To further improve performance, Titan applies the cover in a single piece, reducing the total number of seams on a Titan hose to just one.

Titan is the only brand of hose you can buy with a seamless tube and one-piece cover in all sizes from 1-1/4 in. to 8 in. I.D.

Tested in the lab, proven in the field.

On every new product, Titan runs a battery of tests in its own lab — tensile, elongation, hardness, gravity, volume swell, oven aging, ozone, cold flex, hydrostatic proof — among many others.

In addition, if you specify Titan Factory Certified, we'll deliver your hose assembly with a signed certificate that it was successfully tested to 150% of its highest rated pressure.

Cheap hose isn't worth it.

Sure, we know you can often buy hose assemblies for less than Titan, but why take the risk? With a Titan hose assembly, it's safe and secure.

To find out more about Titan's one-of-a-kind products and how Titan Factory Certified testing procedures can save you headaches, call, write or fax Titan today.

Isn't peace of mind worth a few extra cents a foot?
